

V1 Startup Week

We've worked with

TLDR

We're organizing the largest startup recruiting event from **October 5th to 9th** at the University of Michigan. Over the last 4 years, we've worked with Ramp, Windsurf, Thrive Capital, Applied Intuition, Rox, and more to make dozens of hires for intern and new grad roles.

How it works

- You provide us your wishlist for a highly technical candidate — skill, background, etc — including any short-answer questions or coding challenges you'd like us to ask
- We screen applications from over **1,000 engineering students** across all majors
- You get a resume book of accepted candidates, including their projects, answers to your recruiting questions, and other technical signals.
- If you're on a **Scale tier**, you'll receive curated intros to the **top 5-10 candidates** uniquely suited for your company — as well as the ability to host an optional in-person event.

Logistics

DATE

October 5th–9th. If you are unable to chat with students during this time or have more urgent hiring needs, we are flexible on timelines.

LOCATION

In-person on campus at the University of Michigan (highly recommended for Scale tier), but we can accommodate virtual attendance.

Pricing

For any new grad candidate hired through Startup Week, we ask that you pay **50% of your full time recruiting referral fee**, 90 days after their start date.

GROWTH — \$500

- Access to the full resume book of **100 curated engineering candidates**
- Ability to ask custom short-answer questions or coding challenges
- Logo on all marketing material
- Ability to send merch for us to share with candidates in-person

SCALE — \$1,000

- Everything included from Growth tier
- Curated chats with **5-10 top matches** that are highly qualified & interested
- (optional) host an in-person recruiting event — dinner, fireside chat, coffee chats, tech talk, or anything else
- White-glove support from the V1 team on making your recruiting goals a reality

What is V1?

V1 is the premier builder community at the University of Michigan, producing founders and engineers who go on to build at some of the greatest companies in the world. In 6 years, alumni have gone on to **OpenAI, Ramp, Notion, Cursor**, and more, and have founded dozens of venture-backed startups.

- **Yash Gaitonde** was an active V1 member who went on to work at Notion, and is now building at Cursor
- **Samay Shamdasani** founded V1, then interned at Ramp as employee #71 before it became one of the fastest-growing startups ever
- **Mikey Kim** (AgentMail) and **Bob Wei** (embedder.dev) each met their YC group partner when they visited V1, went through YC S25, and are still building today
